## PERSONAL AND ACADEMICS PROJECTS

### VIPets (03/2022 - 03/2022)

- This Spa was the Final project we made as a group. I was working as a back developer. Using Node Mailer. Sequelize. NodeJs, etc.
- These web app was inspired through a real urgency we can have with our pets. You can find maps with 24 clinics attention & emergencies.
- Make login/logout. Make reserves. Pay your visit with PayPal.
- Make your profile, your pet profile. Add Photos. Search for lost Pets
- At the landing page, you can watch a carousel with all Lost Pets, with the Phone number of the owner, in case you find it and want to contact him/her.
- Also have Qr Code generator for the pet's collar, with all the info of you and your pet, to make easiest to find you.

### Portfolio personal Silvina Staniszewski (01/2022 - 01/2022)

- Development of digital, interactive Portfolio, where you can download my Resume, see some mini projects I made in the bootcamp. Work with Sass and pure React.

### Todo List (12/2021 - 12/2021)

- Application created with Vanilla Javascript and Sass. You add your tasks, remove completed ones, filter items (pending, completed, all).

### PI- Food App (Henry Bootcamp) (02/2022 - 02/2022)

- Development of a Spa (Single Page Application), using:
- FrontEnd: React for front & Redux for state management. All components were designed with Pure CSS.
- BackEnd: Consumption SPOONACULAR's Api, Developed with NodeJS & Express.
- Data Base: Sequelize, PostgreSQL.
- Features: Search cache / Orders (alphabetically, by maximum and minimum values) Filters (by type of diets / by created in the database or brought from the api) / Form to create new recipes (saved in the database). Form controlled with JavaScript
